# Table of Contents

1. QCA Defect and Fault Analysis of Diverse Nanostructure for Implementing Logic Gate  
   *Kunal Das and Debasis De*  
   1-5

   *K.Latha and R.Manivelu*  
   6-10

3. A Comparison of the Performance of ICA Algorithms for Fetal ECG Extraction using Time Domain Multiple-Sources Interference Data  
   *S.D.Parmer and Bhuvan Unhelkar*  
   11-13

4. An Integrated Context Modeling Approach to Neural Network for Natural Image Recognition  
   *G.Shyama Chandra Prasad, A.Govardhan, and T.V.Rao*  
   14-18

5. Hierarchical Load Balancing Approach In Computational Grid Environment  
   *Malarvizhi Nandagopal and Rhymend V. Uthariaraj*  
   19-24

   *S. Chattopadhyay and S.K. Sanyal*  
   25-29

7. Prediction of Classification Accuracy with Selected Features in Unsupervised Data  
   *D.Devakumari, K.Thangavel, P.Alagambigai and K.Sarojini*  
   30-36

8. Wireless Vision based Real time Object Tracking System Using Template Matching  
   *I Manju Jackin and M Manigandan*  
   37-44

9. Effect Of Scalability On Aodv, Dsr And Zrp Routing Protocols For Manet’s  
   *Shaily Mittal and Prabhjot Kaur*  
   45-49

10. SIR Analysis of Overloaded CDMA System Using Orthogonal Gold Codes  
    *Sasipriya S and Ravichandran C.S*  
    50-54

11. Cancellation of Zigbee interference in OFDM based WLAN for multipath channel  
    *Minakshmi Roy and H.S. Jamadagni*  
    55-59

12. A Fault-tolerant Switch for Next Generation Computer Networks  
    *V. S. Tripathi and S. Tiwari*  
    60-64

13. Performance Analysis of Restoration Schemes in Survivable WDM Mesh Networks  
    *B. Mohapatra, R.K. Nagaria and S. Tiwari*  
    65-69

14. Effective Approach for Disambiguating Chinese Polyphonic Ambiguity  
    *Feng-Long Huang*  
    70-75

15. A Hybrid Trajectory Clustering for Predicting User Navigation  
    76-80

DOI: 01.IJRTET.03.01.F6
16. An Efficient Distributed Data Clustering Algorithm
   Malay K. Pakhira
   81-89

17. Secure Trust Management Model for Peer-to-Peer File Sharing System
   90-96

18. SVD and Lifting Wavelet Based Fragile Image Watermarking
   Swanirbhar Majumder, Tirtha Sankar Das, Souvik Sarkar, and Subir Kumar Sarkar
   97-100

19. Enhanced User Authentication through Trajectory Clustering
   Hazarath Munaga, J. V. R. Murthy, and N. B. Venkateswarlu
   101-104

20. Image Retrieval using Equalized Histogram Image Bins Moments
    NST Sai and Ravindra C.Patil
    105-108

21. Detecting Malicious Dropping Attack in the Internet
    Lata L. Ragha, B. B. Bhaumik, and S. K. Mukhopadhyay
    109-113

22. Architecting Secure Service Oriented Web Services
    D.Shravani, P.Radhika, P.Suresh Varma, D.Sravan Kumar and M.Upendra Kumar
    114-117

23. Mining Subspace Clusters in High Dimensional Data
    Singh Vijendra, Sahoo Laxman, and Kelkar Ashwini
    118-122

24. Performance of WiMAX for Telemedicine Applications
    Basant Kumar, S.P. Singh, Anand Mohan, Arpit Khandelwal and Ashish Kumar
    123-125

    for Wave length Routed Optical WDM Networks
    Virendra Singh Shekhawat, Mahesh Lagadapati, Dinesh Tyagi, and V.K.Chaubey
    126-128

26. Low Complex-Hierarchical Coding Compression Approach For Arial Images
    M. Suresh and J. Amulya Kumar
    129-133

27. Image Compression Using Wavelet Packet Tree
    Jagannath Sethi, Sibaram Mishra, Prajna Parimita Dash, Sudhansu Kumar Mishra, and Sukadev Meher
    134-136

28. Fusion of Daubechies Wavelet Coefficients for Human Face Recognition
    Mrinal Kanti Bhowmik, Debotosh Bhattacharjee, Mita Nasipuri, Dipak Kumar Basu and Mahantapas Kundu
    137-143

29. A Novel Method for Speaker Independent Recognition Based on Hidden Markov Model
    Feng-Long Huang
    144-147
